

Borís Kunac

Unit Manager

Over my 20 years of experience in the industry, i have developed a solid reputation and pride myself on my high standard of work. I build a fast rapport with others and respond to their needs effectively and efficiently.

Since 2007 i have used my location skills and focussed more on my role as a unit manager which is a role i thoroughly enjoy.

The locations department gave me the opportunity to work closely with all departments which led me to very quickly developing an excellent grasp of how a film set should be run and how each department must compliment the other.

For me, no job is too big or too small. I am equally as happy working on a big budget feature films as i am smaller TV series or TV commercials.

I have fit out all my vehicles with a high standard of new and modern Unit equipment that i have established since starting my company Base Unit LTD in 2013.

Safety on set is paramount and one of my key focuses and strengths as i understand the importance of ensuring the wellbeing of all cast and crew members. I always ensure my team and myself maintain a high standard of professionalism and efficiency to continually provide a safe and tidy work environment.

I am Based in Auckland but i am well accustomed to and have experience traveling both within New Zealand and abroad.

Please refer below to a list of Base Unit assets and my work history.
