PROFILE

I started as a Grip Assistant but with hard work and determination I accomplished my goal to be a Key Grip in 2005. I am extremely motivated and committed to working with a Production team / Crew to deliver the most innovative and achievable results possible. My experience on Action 2nd Units has given me the opportunity to work closely with Stunt co-ordinators / Safety team to create grip rigs that capture amazing shots. With dependable organisational skills I am excellent at managing my grip team, film set dynamics and staying within budget. Prior to 2009 I have worked as a Best Boy Grip, Dolly Grip, Grip Assistant and Crane Operator - which has helped me develop the fundamental skills of Gripology.

In 1990 I worked as a Crane Op assist on Xena, after that I was captivated and decided to pursue a career in the film industry. As a Key Grip I have a strong work ethic and always strive to provide the best professional service possible. Given the budget restrictions of some NZ shows I know how to allocate limited resources to get the money shots. I always give 100% no matter what the budget and strongly believe in giving back and supporting the NZ film industry.
