## PERSONAL STATEMENT

---

I am a 30-year-old male who made the switch to film from a career in music, radio and artist/event and tour management around two years ago. Over the past 12 years, I have gained extensive people/time management skills from working in high pressure live music and radio situations, and I am now actively utilising these skills in various roles in the film industry, which I have been doing since early 2019. I am keen and eager for work on any film set, in any role, to continue to learn how the industry works, though I have been making my way in the locations department for the past year and a half. I am a hard worker, am physically fit, have a full drivers license, can drive a manual vehicle, have my own wagon, some cones, and some barriers. I have worked more as a location assist, however have completed some larger jobs as onset manager and with my event and promotions background, large scale operations with crowds over 200-300 are second nature. I am eager to make the move to accepting more responsibility where possible. I also hold a Bachelor of Communication Studies from AUT and a Diploma in Film Making from SAE Auckland.
